## PROFESSIONAL SUMMARY

Postgraduate student pursuing an M.Sc. in AI & Data Science, with a B.Sc. in Computer Science and hands-on experience building web platforms and data-driven Python projects. Comfortable across the stack, from PHP/MySQL backends to NumPy/Pandas-based analysis, with a strong academic record (final CGPA 9.29) and a disciplined, project-driven approach to learning.

## EDUCATION

|                                                                                                |             |

## TECHNICAL SKILLS

|                              |                                                                         |
|------------------------------|-------------------------------------------------------------------------|
| <b>Programming</b>           | Python, C, C++, JavaScript                                              |
| <b>Data &amp; AI</b>         | NumPy, Pandas, Machine Learning, Data Analysis, Artificial Intelligence |
| <b>Web Development</b>       | HTML, CSS, JavaScript, PHP, MySQL, Bootstrap                            |
| <b>Tools &amp; Platforms</b> | Git, GitHub, VS Code, PyCharm, XAMPP                                    |

## PROJECTS

### AstraShield — Intrusion Detection & Prevention System

*PHP · MySQL · Python · HTML · CSS · Bootstrap*

- Built a web-based security platform to monitor suspicious activity and detect potential threats in real time.
- Implemented user authentication, device monitoring, security logging, and an admin dashboard.
- Designed the system architecture end-to-end, from database schema to front-end monitoring views.

### Student Data Analysis

*Python · NumPy · Pandas*

- Cleaned and analyzed a student academic performance dataset to surface trends and patterns.
- Used Pandas for aggregation/statistical summaries and NumPy for numerical computation.
- Produced visual summaries to communicate findings clearly.

### Personal Portfolio Website

*HTML5 · CSS3 · JavaScript*

- Designed and developed a fully responsive personal portfolio from scratch, deployed on GitHub Pages.
- Implemented scroll animations, an interactive project showcase, and a validated contact form.

## CERTIFICATIONS

|                                                                                                              |           |
|--------------------------------------------------------------------------------------------------------------|-----------|
| <b>Mastering Data Structures &amp; Algorithms using C and C++</b> — Udemy (Instructor: Abdul Bari, 58.5 hrs) | Sept 2024 |
| <b>Introduction to Python</b> — Free Course Certificate                                                      | Dec 2025  |

## ACHIEVEMENTS & ACTIVITIES

- Maintained a strong academic record across all years, achieving a final CGPA of 9.29.
- Completed Junior NCC training, including participation in national and city-level camps.
- Achieved multiple sports accomplishments alongside academic coursework.
- Independently designed and built AstraShield, a full-stack security monitoring platform.
